ALLERGEN GUIDE

This guide has been prepared to help our diners know what allergenic ingredients are contained in each of our dishes. The allergenic ingredients in this guide are in accordance with the EU Food Information for Consumer Regulation (EU FIC).

Whilst we do our utmost to provide meals for all allergy sufferers unfortunately it is not always possible to make a version of every dish on the menu that will be suitable for every allergy sufferer.

If you have an allergy which is not listed or if you are unsure whether we can cater for your needs please contact the restaurant to discuss your requirements. To help allergy sufferers and those with food intolerances we have produced a detailed sheet giving details of which of the 14 most common allergens are in each dish we produce.

The following allergens are present as raw ingredients in the kitchen:

- **celery**
- **cereals containing gluten** – including wheat (such as spelt and Khorasan), rye, barley and oats
- **crustaceans** – such as prawns, crabs and lobsters
- **eggs**
- **fish**
- **lupin**
- **milk**
- **molluscs** – such as mussels and oysters
- **mustard**
- **tree nuts** – including almonds, hazelnuts, walnuts, brazil nuts, cashews, pecans, pistachios and macadamia nuts
- **peanuts**
- **sesame**
- **soybeans**
- **sulphites** (if they are at a concentration of more than ten parts per million)

Whilst we make every effort to prevent cross contamination of allergens there is always the possibility cross contamination may occur. Some fish dishes may contain bones.

Our kitchen is nut free and all of our dishes are prepared without the use of nuts and peanuts. However, some of the products we procure, whilst being nut free may contain traces and are prepared in environments where nuts and peanuts, and derivatives of it are used on site.
